

ADD MOVE Stool / Chair / Barstool
Design: Anya Sebton, 2015

LAMMHULTS

UNLIMITED POSSIBILITIES FOR THE ACTIVE WORKSPACE

Designer Anya Sebton takes another step forward in the evolution of the successful Add stool and chair. In addition to the strong graphic style, the Add range now offers almost unlimited possibilities in terms of dynamic work environments. As a further complement to the Add range, Add Move goes hand in hand with modern demands for design, function and ergonomics. Add Move gives a new look to dynamic work environments as a flexible, multifunctional and compact office chair.

The mesh seat is available in four colours, white, grey, black or rust brown. There is also a version of Add Move with a quilted seat pad in fabric or leather. Both a 4-feet and a 5-feet frame on glides are available, the 5-feet is always height-adjustable and can also be combined with casters. To facilitate repair, maintenance, and ultimate recycling, all its components are separable.

“The Add range exhibits perfect balance between design and function, and with a natural angle the seat offers an ideal ergonomic position. Better circulation provides more oxygen to the brain, which in turn improves concentration.”

— Anya Sebton, Designer
