

ADD Stool / Chair / Barstool
Design: Anya Sebton, 2015

LAMMHULTS

MOBILE COMFORT FOR ANY ENVIRONMENT

The Add stool/barstool strikes the perfect balance between aesthetics and function. The sled base tilts the stool to the rear, while it tilts the seat forward. A balance for those who stop and go. The seat's natural incline provides an ideal position, encouraging the user to stand up from time to time. Active seating allows active and creative meetings. Adding the generous back enables shifting between active and a more relaxed sitting.

Add stool/barstool comes in three heights, with or without a back. Made from bent steel tubing and a seat of molded wood, upholstered in textile or covered in black polyurethane, Add brings a unique expression to any busy environment or work environment.

“It was important to create an exciting balance in the meeting between back and seat, the back is generous and embracing in its shape.”

— Anya Sebton, Designer
