

ARCHAL Chair / Armchair
Design: Johannes Foersom & Peter Hiort-Lorenzen, 2012/2013/2014

LAMMHULTS

VERSATILE, REFINED & STYLISH

Archal brings a new level of form and style innovation to the Lammhults seating collection. Using a frame of cast aluminium, Archal goes beyond the limitations of bent steel tubing, with the sculptural form of solid cast aluminium. Produced locally, the Archal frame is made using 99,9% recycled material, the equivalent of approximately 360 aluminium soft cans.

Archal is available fully upholstered with quilting, with or without arms and with two different swivel bases: a 4-feet swivel base with glides, and a 5-feet swivel base version with casters. Both frames in the same graphic, stylish Archal design made from recycled aluminium..

“The archal frame is made using 99.9% recycled material, the equivalent of more than 360 aluminum soft drink cans.”

— Johannes Foersom & Peter Hiort-Lorenzen, Designers
