

SPIRA Chair / Armchair
Design: Johannes Foersom & Peter Hiort-Lorenzen, 2004

COMFORT FOR THE MASSES

Spira is about comfort in a chair for larger installations. The designers explain: "Our primary approach was to the issue of comfort. With Spira, the comfort image is its shape. An upholstered chair, usable as a volume chair, with volume chair features like linking and stacking". Spira adds flexibility to its comfort performance. The separate back connects to the seat frame with two spring steel inserts that allow seven degrees of back deflection.

The value of Spira is in its clever comfort features in a volume chair and its various versions. Spira is available fully upholstered, with upholstered seat in combination with wooden or polyurethane back or seat and back in cast polyurethane. As a chair or armchair, with a stackable four-leg base, or swivel-tilt four-star base with glides or five-star base with casters. Armrests in black or white Woodfibre. Additional: Quilted upholstery

“Our primary approach was to the issue of comfort. With Spira, the comfort image is its shape. An upholstered chair, usable as a volume chair, with volume chair features like linking and stacking”
