

**X75-2** Armchair  
Design: Børge Lindau & Bo Lindekrantz, 1972

## A CLASSIC TRUE TO ANY ERA

Lammhults' early collaboration with the designers Börge Lindau and Bo Lindekrantz lead to many successful products. The second product group, named X75, was introduced in 1972. Many of the pieces could be folded, such as the timeless X75-2, with steel tube frame and canvas seat and back. The practical nature of folding furniture which allowed more compact living became an embellishment to the playful stylistic nature of the Lindau-Lindekrantz design

The combination of design and engineering was so unusual that X75-2 was quickly recognized as trailblazing. X75-2 comes with a seat and back in canvas, the seat with reinforcements in matching leather. The frame comes in powder coated or chromium plated steel tubing. The cross tubing is always powder coated in black
